Salon Pet Esthetician

Program Overview

The Salon Pet Esthetician program was a formal course of study developed to provide foundational education in skin, coat, and salon-based pet esthetics for everyday grooming practice. The program introduced learners to product and ingredient awareness, brushing and de-matting techniques, coat preparation, drying, finishing care, and basic therapeutic support within the salon setting. As a structured self-guided program, it reflected formal foundational education in practical pet esthetics.
