

Aims

This hands-on course aims to provide dental technicians with an increased understanding of how you can achieve outstanding aesthetic results, focusing on refining techniques that improve productivity when working with the IPS e.max Ceram Art stain and glaze system on your all-ceramic restorations.

During this hands-on course, trainer Sylwia Arizpe will discuss the scientific properties, handling characteristics and recommended application of IPS e.max Ceram Art, before demonstrating the techniques required to achieve natural translucency, character and depth to the restorations.

Correct IPS e.max Ceram Art firing procedures will be explained and demonstrated to ensuring delegates fully understand how to get the best result from the material selections. The tutor's preferred techniques for final hand polishing will also be explained.

Objectives

- Gain an in-depth knowledge of the uses and possibilities of the IPS e.max Ceram Art stain and glaze system.
- Master the surface treatment of all ceramics with a view to recreating natural surface texture.
- Improve the application of external stains to eliminate shade inaccuracies
- How to correctly apply IPS e.max Ceram Art, to achieve incredible pink and white aesthetics.
- Increase awareness and understanding of firing protocols for use on all ceramic and zirconia restorations
- Introduce hand and polishing protocol to achieve natural dental aesthetics
