

CERTIFICATE OF ENABLEMENT

This certificate confirms that the participant has successfully completed DyeMansion’s VX1 Go-to-Market Enablement Training.

Participants receiving this certification are recognized as trusted launch partners capable of identifying early adopter opportunities, qualifying applications, and supporting the successful market introduction of the DyeMansion VX1 system.

CERTIFICATION COMPETENCIES

This certification validates advanced capability in:

- ✓ Understanding the VX1 value proposition and product-market fit
- ✓ Identifying additive manufacturing customers transitioning toward production
- ✓ Qualifying applications that benefit from vapor smoothing
- ✓ Positioning VX1 within the Print-to-Product manufacturing workflow
- ✓ Distinguishing VX1 opportunities from higher-volume production solutions
- ✓ Initiating benchmarking and validation processes
- ✓ Advancing qualified opportunities through the DyeMansion channel ecosystem

PURPOSE OF THE CERTIFICATION

The VX1 Go-to-Market Enablement Certification recognizes partners who demonstrate advanced understanding of the DyeMansion VX1 solution and its role in enabling industrial post-processing within additive manufacturing workflows.

The purpose of the certification is to prepare partners to support the early market adoption of the VX1 by identifying qualified applications, positioning the system effectively, and enabling customers to transition toward production-ready additive manufacturing.

OUTCOME

Upon successful completion of this certification, partners are recognized as VX1 Market Leaders capable of supporting the early adoption and market introduction of the DyeMansion VX1 system.

These partners play a key role in identifying early adopter opportunities and enabling the transition toward scalable additive manufacturing production workflows.
